

GREEN/SERIES PANTHER D

ENGINE

Its 56 HP Kohler diesel engine provides strong shredding power.

WIDE INFEED & HOPPER

The hopper, equipped with an air intake under the infeed conveyor, improves ventilation by 25% and allows large quantities of material to be fed efficiently.

ROTOR PUISSANT

The Panther rotor features 3 shredding chambers with 12 hammers and 6 blades for a good quality shredded material and optimized ventilation.

POWER MIXED ROTOR

New-generation high-performance mixed rotor, designed to optimize engine power, save energy and resources, preserve the material and the environment, and produce a more refined shredded output.

CO2 REDUCTION

Optional: System that automatically detects the presence of the operator, adjusting the shredding process to use the engine's full power only when necessary.

NO STRESS

System that automatically adjusts the feed speed based on the thickness and type of material, to prevent any clogging.
