

WOOD/SERIES

WS20PTOT

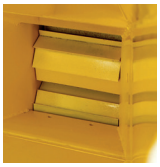

MOUNTED ON 270° TURRET

allowing better optimization of the orientation on job sites depending on the tractor's position.

POWER TAKE -OFF DRIVEN

For 540 rpm, for tractors up to 80 HP (the power of your tractor will determine the consistency of the No Stress operation).

DOUBLE INFEED ROLLER

Its double infeed roller ensures consistent material feeding to assist you in daily operation.

	WS20PTOT
Recommended tractor power	60 HP min to 80 HP max
	540t/m
Diameter of infeed roller	900
Cutting disc diameter (mm)	218
Infeed roller width (mm)	310
Infeed roller diameter (mm)	240
Adjustable chute (°)	270
Hopper size P x L (mm)	1500 x 1290
Height of feeding (mm)	870
Noise level (dB)	124
Reference	WS20PTOT
Comfort Kit	KITWS20PTOT-P

The WS20PTOT is also available in a standard PTO version and diesel turret model.

The WS20PTOT guarantees high performance on all your job sites! Its turret and 270° adjustable chute provide working comfort, visibility, and flexibility for every project.

Chipping branches up to 20 cm with the "Cutting Disc" technology, its 270° adjustable chute and two infeed rollers deliver comfort, visibility, and flexibility on all your sites. The wide loading hopper makes feeding branches easy and folds for transport, ensuring optimal efficiency.

Maintenance and machine monitoring are simplified thanks to its ultra-robust design, conveniently designed service covers, and the Pilot System, which centralizes machine control.

CUTTING DISC

POWER TAKE-OFF

UP TO 20 CM

TS INDUSTRIE CUTTING DISC TECHNOLOGY

The cutting disc of our shredders, also called the Cutting Disc, is a heavy disc equipped with two adjustable knives passing in front of a counter blade to make a clean cut of the material, similar to a woodworking planer. This technique produces uniform chips suitable for attractive mulching.
